**Bending Sets**

Bending sets are available bare or with linings to accommodate special conditions and non-standard pipe or coating. Standard bending sets will accommodate pipe manufactured to API-5L. The largest pipe size in a given pipe bending machine range requires a bending die only.

The first number indicates the pipe size while the second number indicates the maximum range of the bending machine where it fits. For example: an LBS 16/20 would accommodate a 16" pipe on an SPB 6-20 bender. An LBS 16/30 would also accommodate a 16" pipe but on an SPB 16-30 bender. All models are also available as bare bending sets.
