

Screening area	60 ft ²
Operating weight	Up to 83,500 lbs
Horsepower	Up to 357 kW / 350 HP

SPD-350 PADDING MACHINE

Screening area	60 ft ² / 5.57 m ²
Operating weight	83,500 lbs / 37,954 kg
Horsepower	257 kW / 350 HP

The new SPD-350 is safer and more productive!

The upgraded design features a moveable cabin for increased visibility and requires no tear down or setup, meaning the machine is ready to work when it arrives onsite. Other enhancements include a reversible conveyor, 3 cameras on the machine to monitor the off-side and loading of material, and an upgraded undercarriage for more stability.

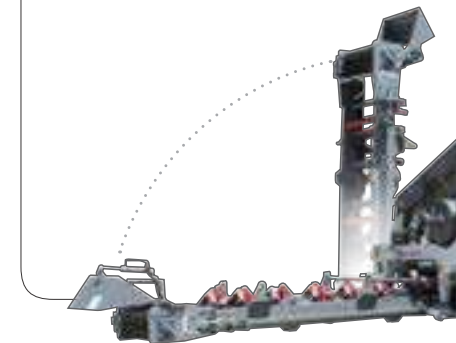

Folding Platform

The cabin's platform can be folded for easy transportation.

Rotating Cabin

Hydraulically slides out to either side of the machine to increase visibility of the ditch.

Reversible Conveyor

Conveyor can be used on either side of the machine. It also can be folded into three parts for easy shipping w/o disassembly.

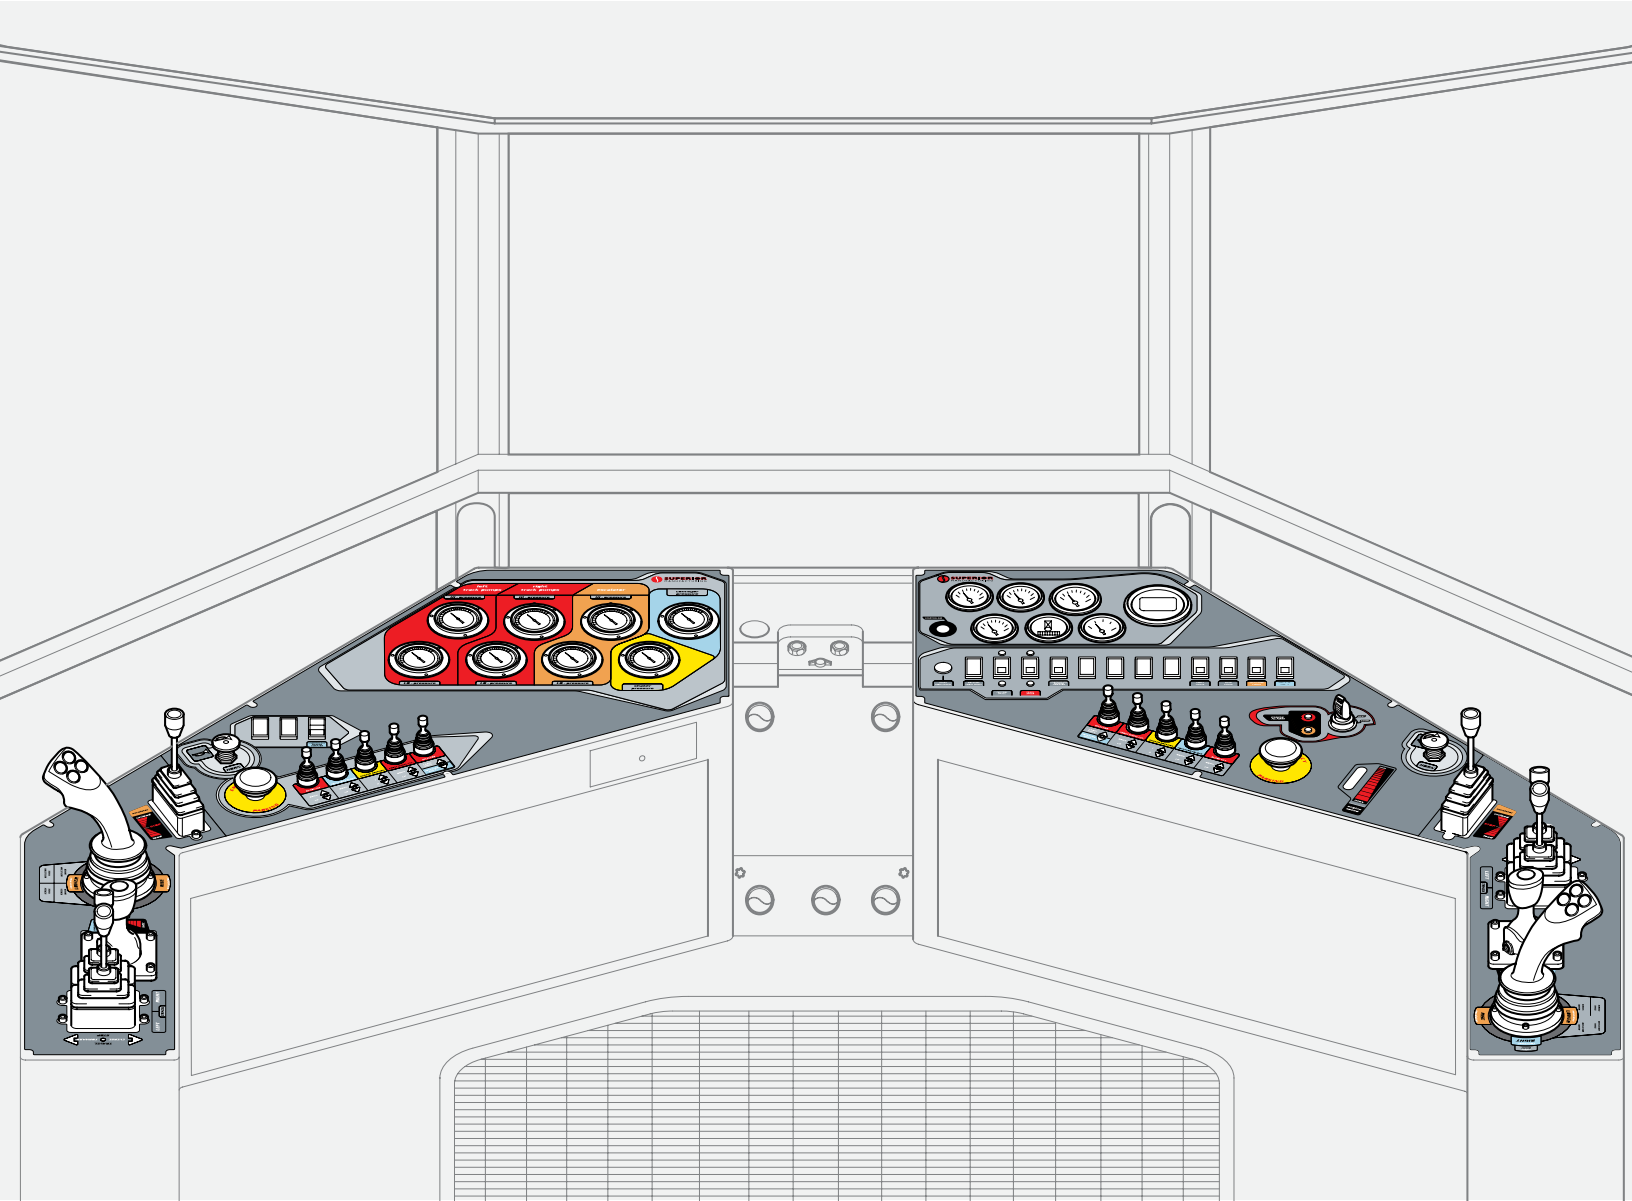

A hydraulically-controlled dowel adjusts the angle and distance at which the material is placed back into the trench.

Insulated Engine

The engine compartment reduces noise to comply with EU noise limit requirements.

CABIN

DUPLICATE CONTROLS

The SPD-Series is designed to operate on either side of the ditch. To this end, the oscillating cabin can slide out by hydraulic means to provide the operator with a clear view of the ditch and the conveyor section (also able to operate on both sides).

Duplicate controllers on the cabin complement this engineering approach.

AVAILABLE MODELS

SPB-15

Screening volume
1.15 m³ / 1.5 yd³

SPB-25

Screening volume
1.9 m³ / 2.5 yd³

SPD-150

Screening area
2.3 m² / 25 ft²

SPD-160L

Screening area
5.2 m² / 57 ft²

SPD-250

Screening area
2.78 m² / 30 ft²

SPD-350

Screening area
5.57 m² / 60 ft²

SPD-450

Screening area
8.4 m² / 90 ft²
