

Fifth Wheel

SUPERIOR's fifth wheel attachment uses a Holland FWS1 top plate, which is one of the lightest, most durable top plates available anywhere.

Features

- Simple and quick lock adjustment pin with 4 incremental positions reduces the risk of over-adjustment.
- A jaw return spring that prevents the jaw from closing while bob-tailing.
- Visible 'red' safety indicator provides driver with an easy, clear visual indication that the wheel is properly coupled. There is also an automatic secondary locking mechanism.

Dimensions

Top Plate Weight	222 lb (100 kg)
Load Capacity	50,000 lb (22,680 kg)
Pull Capacity	150,000 lbs (68,000 kg)
